
ANTHONY JONES

UX Architect & Product Designer ♦ Active TS Clearance w/ SCI eligibility ♦ anthonytjones33@gmail.com ♦ [Portfolio](#)

PROFESSIONAL SUMMARY

I am a Product Designer with 7+ years of experience designing complex operational systems, enterprise software, and data-driven platforms that support decision-making and workflow efficiency. My background includes leading end-to-end design efforts across user research, workflow analysis, information architecture, interaction design, prototyping, usability testing, and design systems while collaborating closely with developers and cross-functional teams. I currently lead design initiatives across multiple Scrum teams, including modernization efforts for legacy systems, AI enabled product concepts, data-intensive software platforms, complex dashboards, and workflow-driven tools that support operational visibility, informed decision-making, and organizational efficiency. While I am newer to the defense and intelligence space, I bring experience translating complex operational requirements into clear, user-centered experiences that support operational efficiency, decision making, and reduced cognitive burden in data intensive environments. I hold an Active TS clearance with SCI eligibility and have a strong interest in autonomous systems, command and control workflows, geospatial situational awareness, and human machine teaming.

SKILLS

UX & Product Design

Systems Thinking · User-Centered Design · Operational UX · UX Research · Usability Testing · Information Architecture · Interaction Design · Wire framing & Prototyping (Figma, Sketch) · Design Systems · Responsive Web & Mobile Design · Mobile-First & Tablet UX

Enterprise & Operational Systems

Operational Platform Design · Operational UX · Complex Workflows · Decision Support Systems · Situational Awareness Workflows · Dashboard & Data Visualization Design · Geospatial UX · Workflow Optimization · Enterprise Software Design · Legacy System Modernization

Front-End & Development Collaboration

React & Angular Collaboration · HTML/CSS/JavaScript · Design-to-Development Handoff · Component-Based Design Systems · GitHub · VS Code · Bootstrap

Agile & Cross-Functional Collaboration

Cross-Functional Collaboration · Product & Developer Collaboration · Scrum Team Leadership · Agile & Scrum (Certified) · Stakeholder Communication & Presentations · Workflow & Process Improvement

Accessibility & Compliance

Accessibility Testing · DHS Trusted Tester · WCAG 2.2 · Accessible Design Best Practices

Tools & Platforms

Figma · Adobe Creative Suite · Azure DevOps · Jira · Confluence · Remote Testing Tools · PenPot · Sketch

Clearance

Active Top Secret (TS) Clearance with SCI Eligibility; willing and able to obtain Polygraph

WORK HISTORY

UX Architect & SCRUM Master, 12/2023 - Current

Brown & Brown Insurance – Wholesale Division – Daytona, FL

- Designed data-intensive dashboards and workflow-driven interfaces that helped users quickly identify priorities, monitor operational status, and make informed decisions within complex operational environments.
- Led end-to-end user research, information architecture, and interaction design efforts to improve workflow clarity, standardize documentation, and strengthen cross-team design and engineering alignment.
- Designed workflow-driven enterprise tools for high-volume operational environments, translating complex business and system requirements into clear, usable interfaces for end users and stakeholders.
- Spearheaded the redesign of legacy enterprise systems, including ISO-compliant recertification platforms and SQL-based admin tools, improving usability and driving up to a 50% productivity gain across operational workflows.

- Drove a division-wide shift to Figma and scalable design systems integrated with React-based development workflows, collaborating closely with Angular and React engineering teams to ensure consistent UI implementation and design fidelity.
- Managed multiple Scrum teams in an Agile environment, improving sprint velocity by 45% while aligning design, development, and product stakeholders across iterative delivery cycles through process improvements.
- Focused on simplifying complex operational workflows and reducing cognitive load in data-intensive environments.
- Led the design and rollout of a carrier marketplace and buyer system for wholesale distribution, simplifying multi-step workflows and improving onboarding and vendor accessibility across a complex enterprise environment.

UX/UI Designer II – Consultant, 06/2022 - 12/2023

Siemens Sieportal (Virtual Identity AG) | Remote – Munich, Germany

- Led redesign initiatives for complex enterprise and e-commerce platforms, improving usability, streamlining operational workflows, and increasing user engagement and platform efficiency.
- Led the end-to-end design of mySiePortal, a modular dashboard and information management platform built within an Angular-based enterprise environment, and redesigned a legacy forum system to improve navigation, scalability, and user engagement through gamification efforts.
- Developed and maintained scalable design systems and reusable UI components in Figma and InVision, improving design consistency and reducing iteration time across Agile development teams.
- Collaborated closely with developers and product stakeholders to align UI behavior, accessibility considerations, and implementation requirements across web-based enterprise applications.

Product Designer, 10/2022 - 07/2023

Rywave – Munich, Germany

- Led the redesign of marketing and product experiences to improve usability, consistency, and overall customer experience.
- Managed and expanded the Figma design system to improve consistency, scalability, and collaboration across product and development teams.
- Designed a management dashboard that streamlined how shop owners configured and maintained product offerings
- Designed landing pages and marketing experiences focused on clear communication, user engagement, and conversion-oriented workflows.

UX Designer, 06/2022 - 11/2022

Kinexon – Munich, Germany

- Designed MVP features using Figma, resulting in a 25% increase in customer engagement with new functionalities and enhanced usability.
- Designed data visualizations and geospatial interfaces that helped users better interpret operational information and make more informed decisions.
- Led user interviews and usability testing to identify workflow friction, validate design decisions, and improve overall usability and user confidence.
- Redesigned a modular, data-intensive dashboard to improve information visibility, reduce interface friction, and support more efficient user workflows

Product Designer, 02/2021 - 02/2022

Ivicos GmbH – Munich, Germany

- Led a complete website and brand redesign, resulting in a 30% increase in overall conversion rates.
- Applied user research and design thinking to revamp ivCAMPUS, improving workflow clarity and addressing recurring user pain points.
- Developed and managed a comprehensive design system, improving design consistency and streamlining the workflow across teams.
- Collaborated with cross-functional teams to design and launch new features that aligned user needs, business goals, and technical requirements.

Product Designer, 01/2020 - 01/2021

Freelance - Munich, Germany

Project Manager - Photography Network, 09/2018 - 03/2019

BookiPLY - Munich, Germany

UX Project Consultant - Community Manager , 01/2018 - 08/2018

Testbirds - Munich, Germany

Web Designer, 01/2017 - 01/2018

Africa Speaks 4 Africa - Remote

Research, Acquisitions, and Content Manager, 01/2017 - 12/2017

ArtUnited - Remote

Operations Manager, 01/2016 - 12/2016

EDGE Funders United - Manhattan, NY

PROJECTS

PULSE – An OSINT platform designed to aggregate social media and open-source intelligence data to help analysts identify, track, and visualize emerging trends through geospatial workflows and real-time situational awareness concepts.

- Explored large-scale data aggregation, geospatial visualization, and analyst-focused workflows designed to support prioritization, situational awareness, and operational decision-making.
- Focused on reducing cognitive load by transforming large volumes of information into actionable insights through map-centric interfaces, prioritization systems, and data visualization.

RONIN – A tactical decision-support concept exploring how real-time battlefield, sensor, and autonomous system data can be translated into clear, operator-ready actions within command-and-control environments.

- Exploring command-and-control workflows, geospatial situational awareness, mission planning concepts, and human-machine teaming from a UX and operational usability perspective.
- Exploring TAK/ATAK workflows, overlays, data packages, and geospatial situational awareness concepts from a UX and operational usability perspective
- Focused on reducing cognitive load, improving operator trust, and supporting rapid decision-making in high-pressure operational environments.

CERTIFICATIONS

- Systems Thinking - MIT xPro (*Mar 2026*)
- Designing With and For AI - Interaction Design Foundation
- CompTIA Security+ (*In Progress*)
- Professional SCRUM Master I – scrum.org
- 508 Certified Tester Certification – Department of Defense
- Conducting Usability Testing – Interaction Design Foundation
- Design Systems Bootcamp – Memorisely
- Designing WCAG 2.2 Guidelines – LinkedIn Learning
- Responsive Web Design/Dev – freeCodeCamp

EDUCATION

BA Global Ethnographies, Minor: Social Business, Grad: 2017

Long Island University – **LIU Global** - New York, NY

UX/UI Design Certification Bootcamp 03/2019-10/2019
